# Farawave preparation

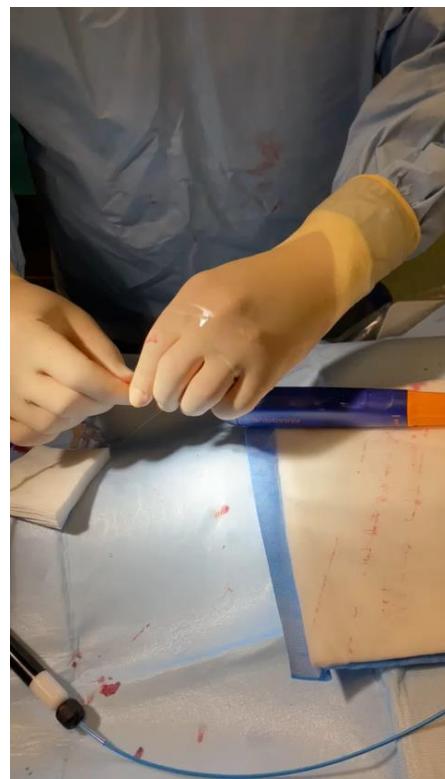

FARAWAVE™  
Pulsed Field Ablation Catheter

# Farawave preparation

Extra stiff J shape wire  
With floppy extremity

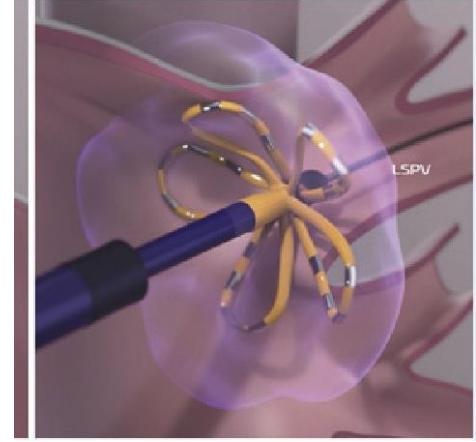

Farawave test over the wire

Balloon and flower shape

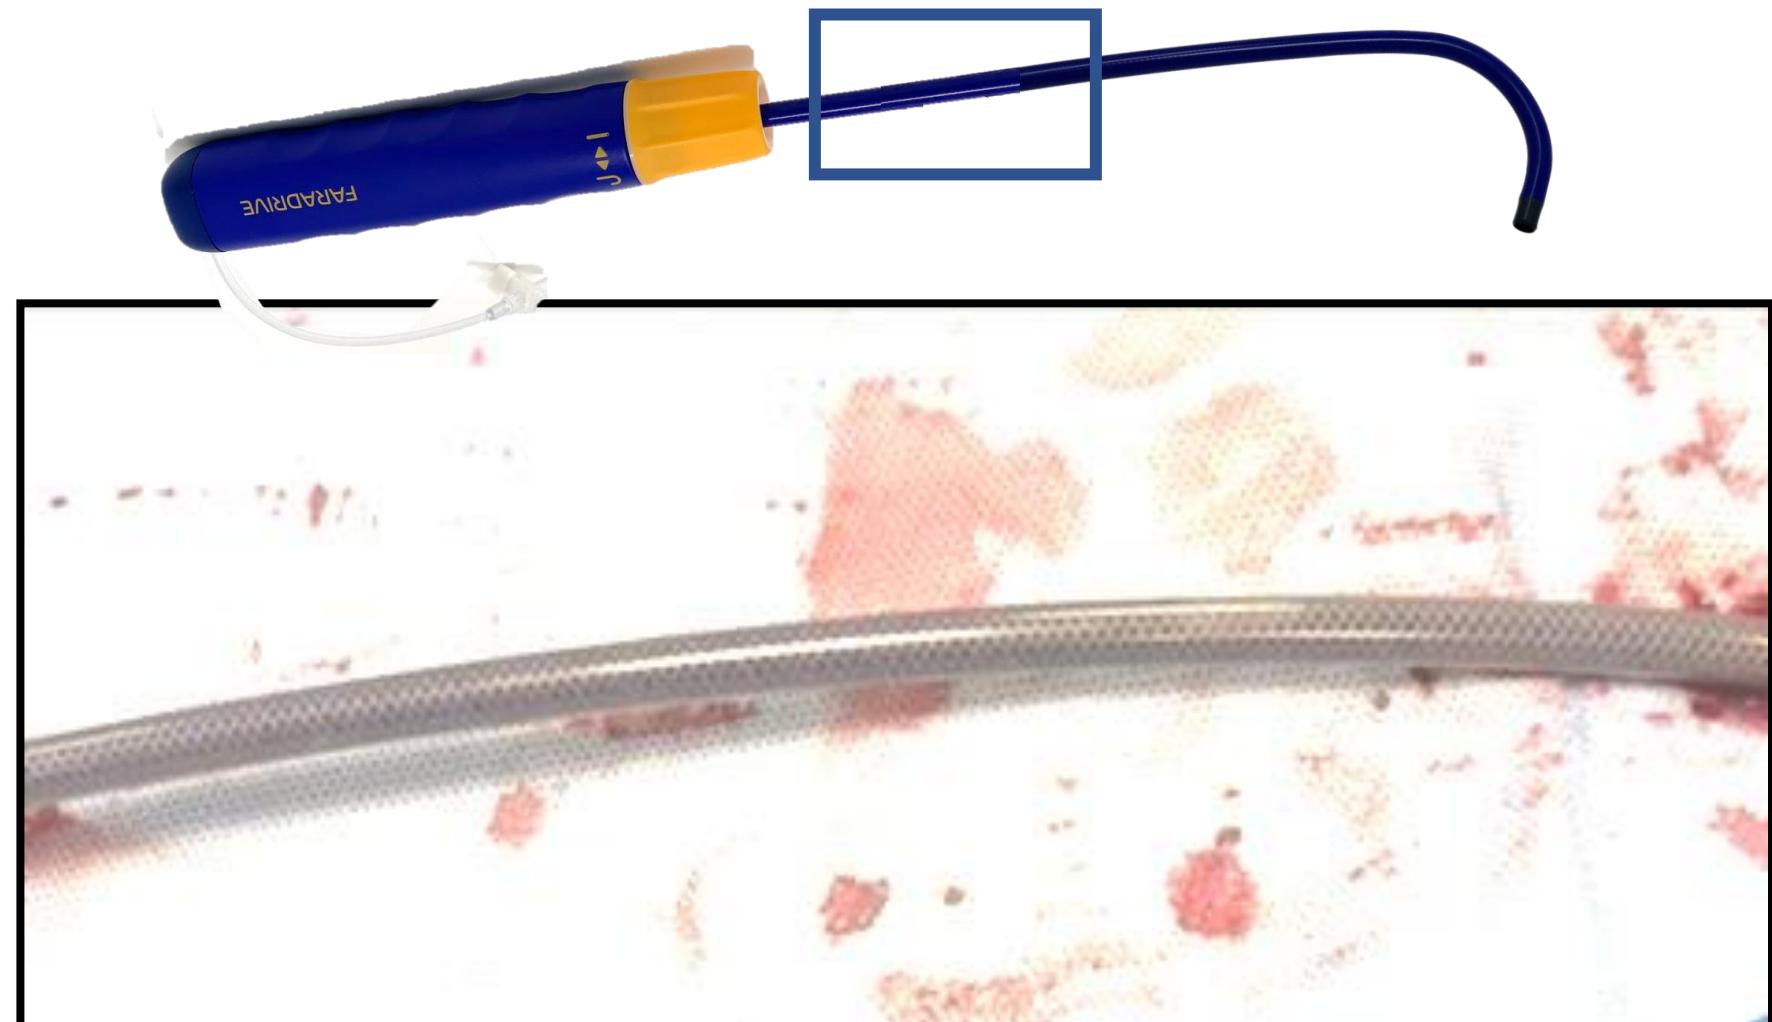

# *Farawave preparation*

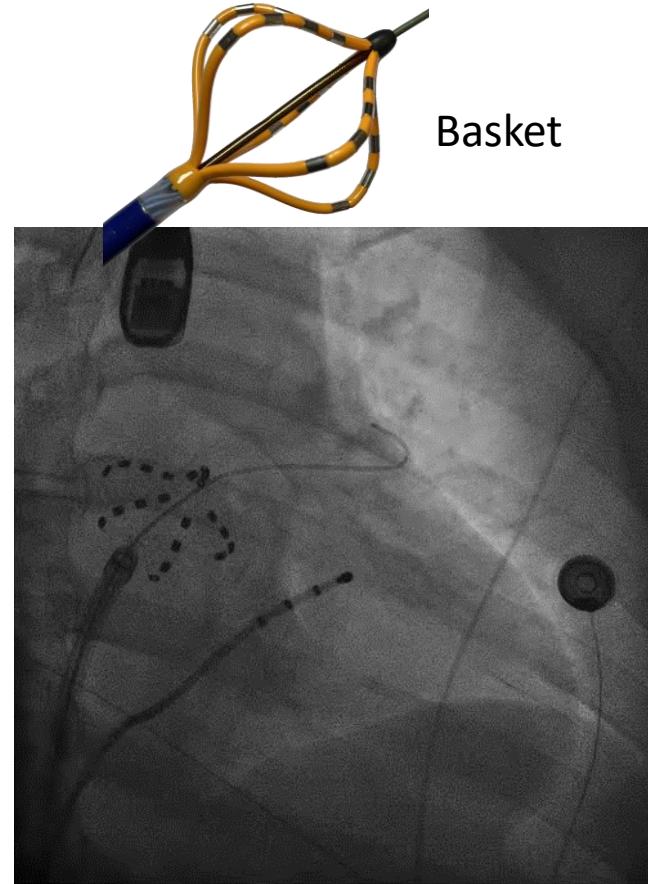

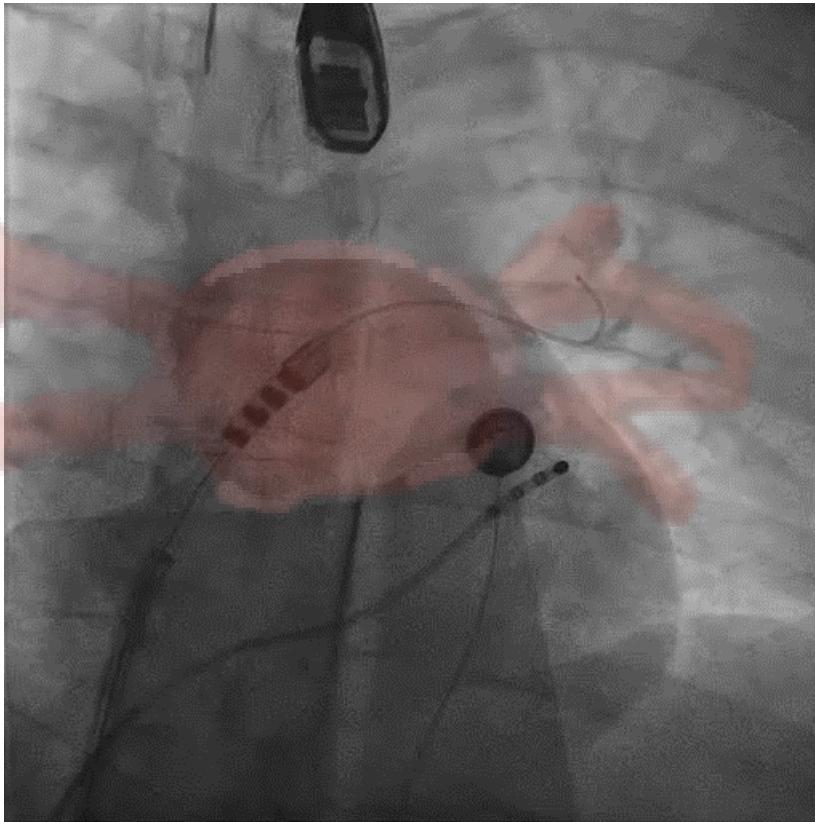

# Farawave introduction

- Introduce about 10-15 cm over the wire in the sheath
- Aspire the bubbles !

# Farawave in the left atrium

Left superior pulmonary vein

Basket

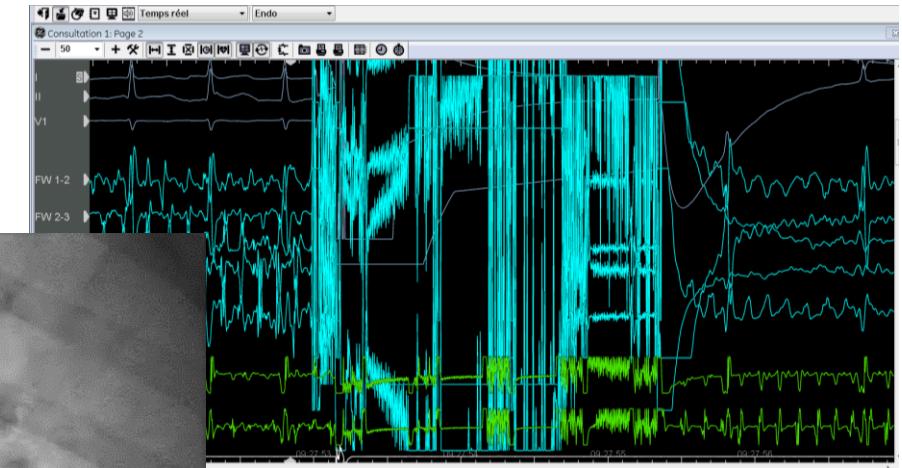

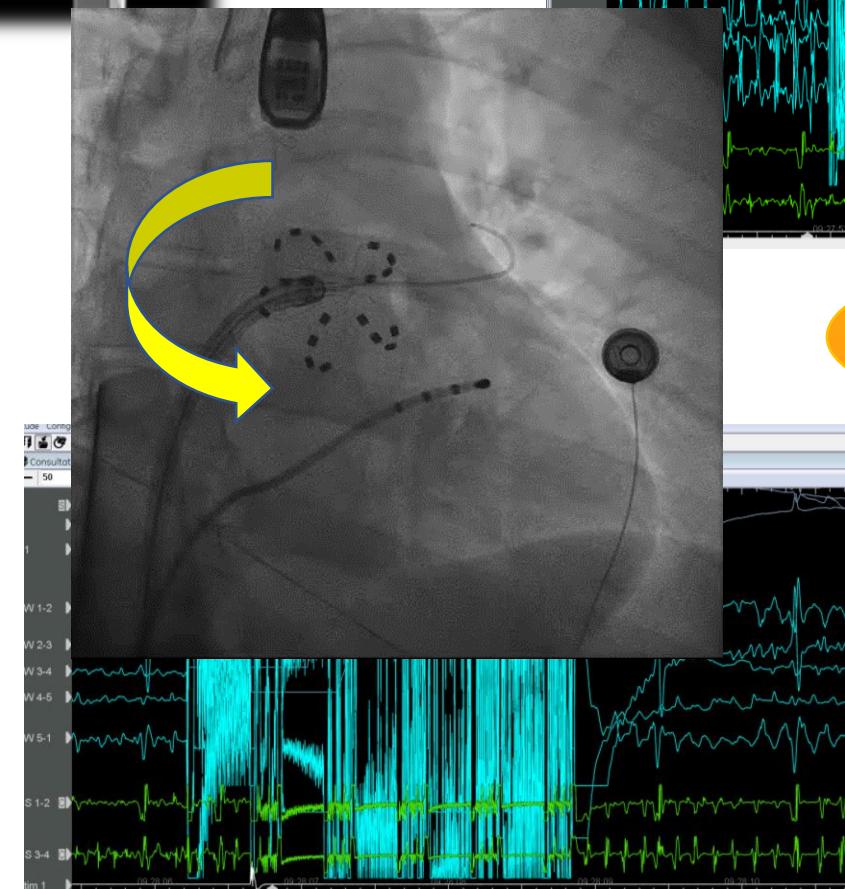

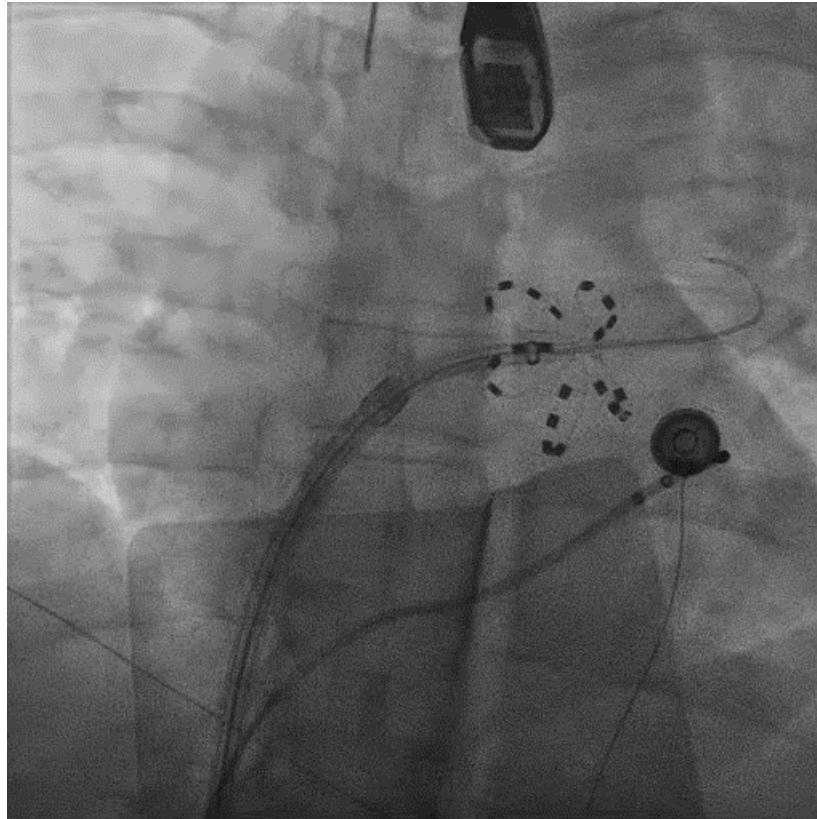

Application !

# Farawave – left superior pulmonary vein

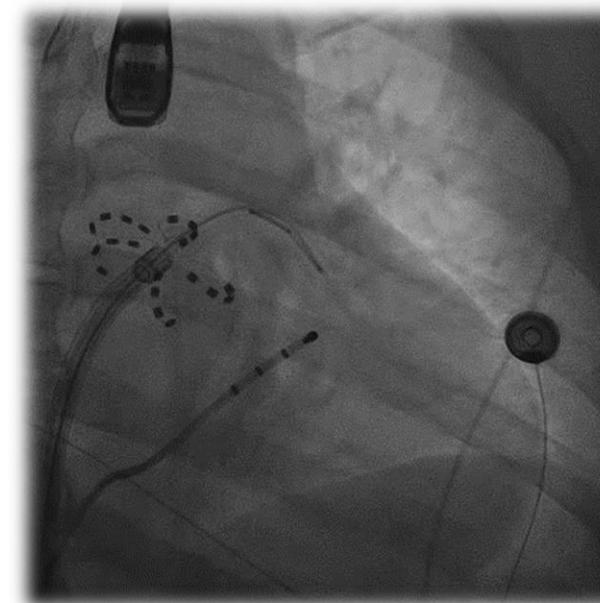

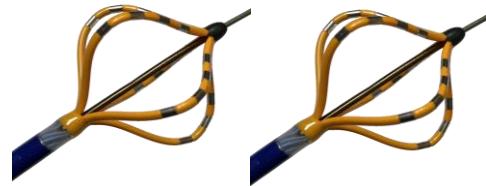

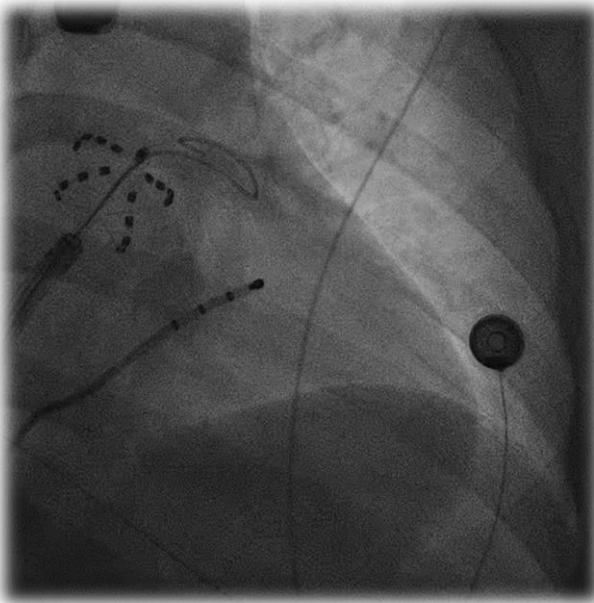

Flower

Application !

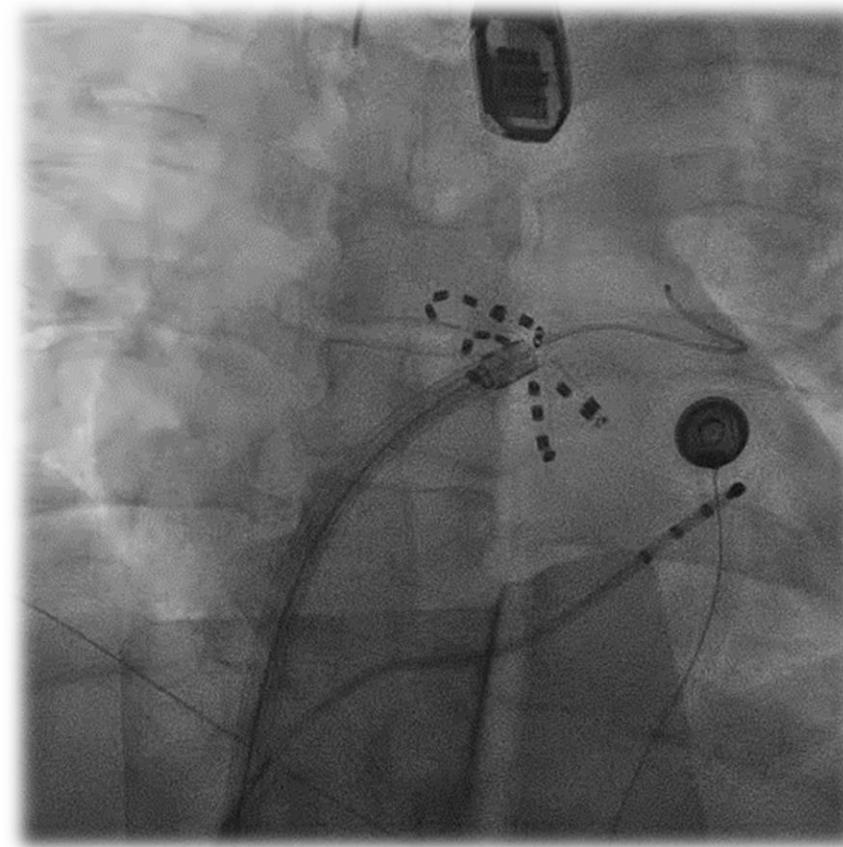

# Farawave – left inferior pulmonary vein

# *Farawave – right inferior pulmonary vein*

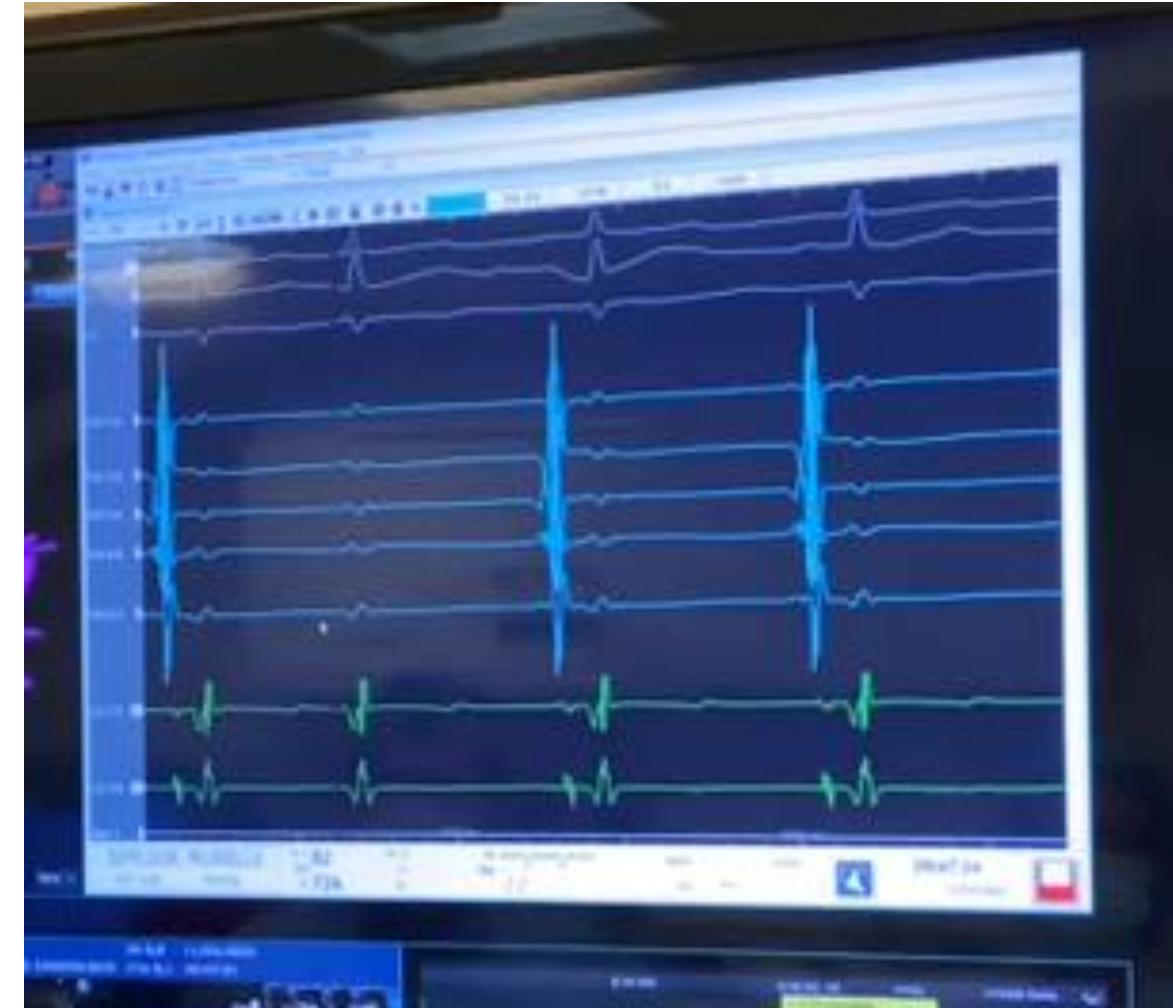

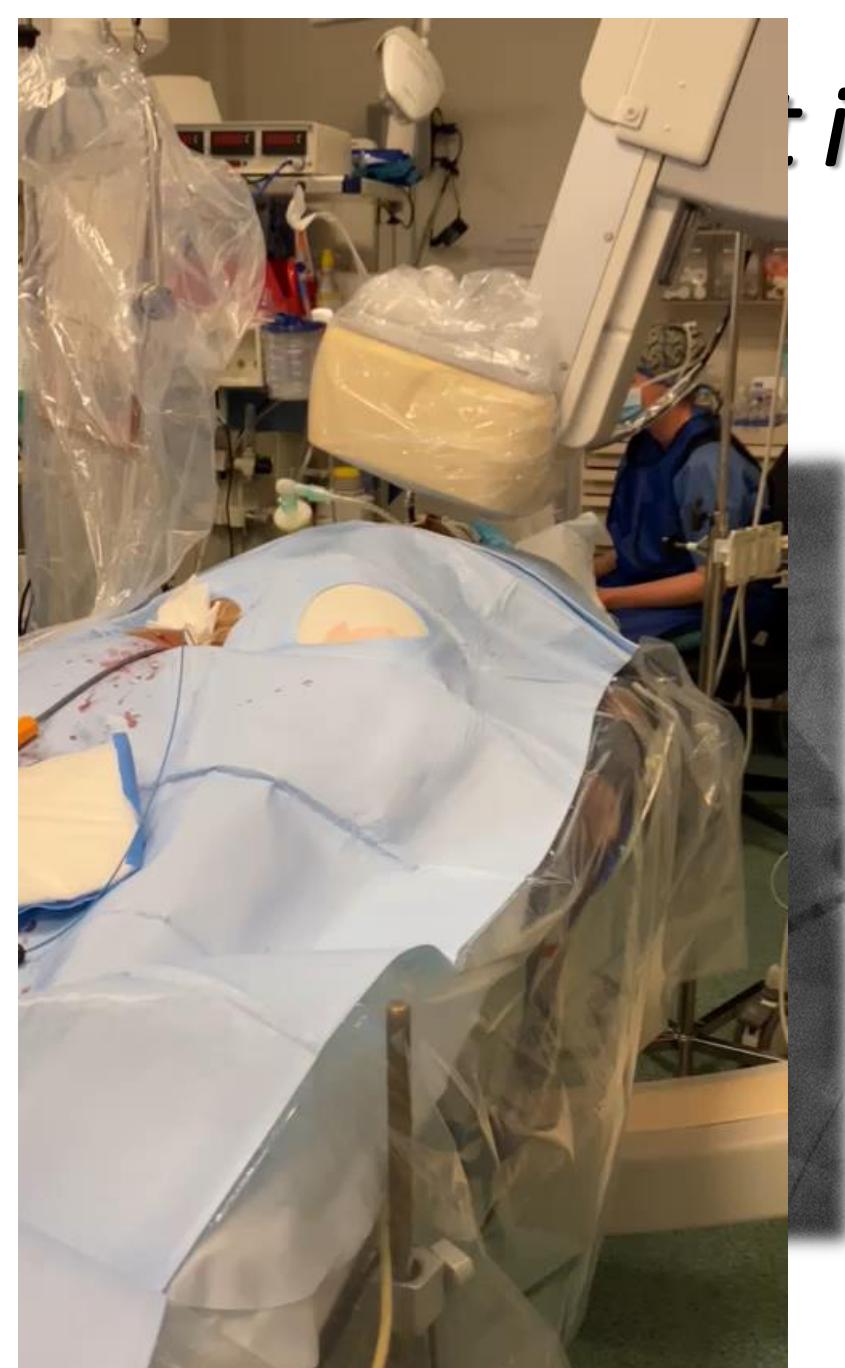

Moving from left to right

- Direct approach by bending the sheath and turning posterior
- Flower position bending the sheath and turning posterior

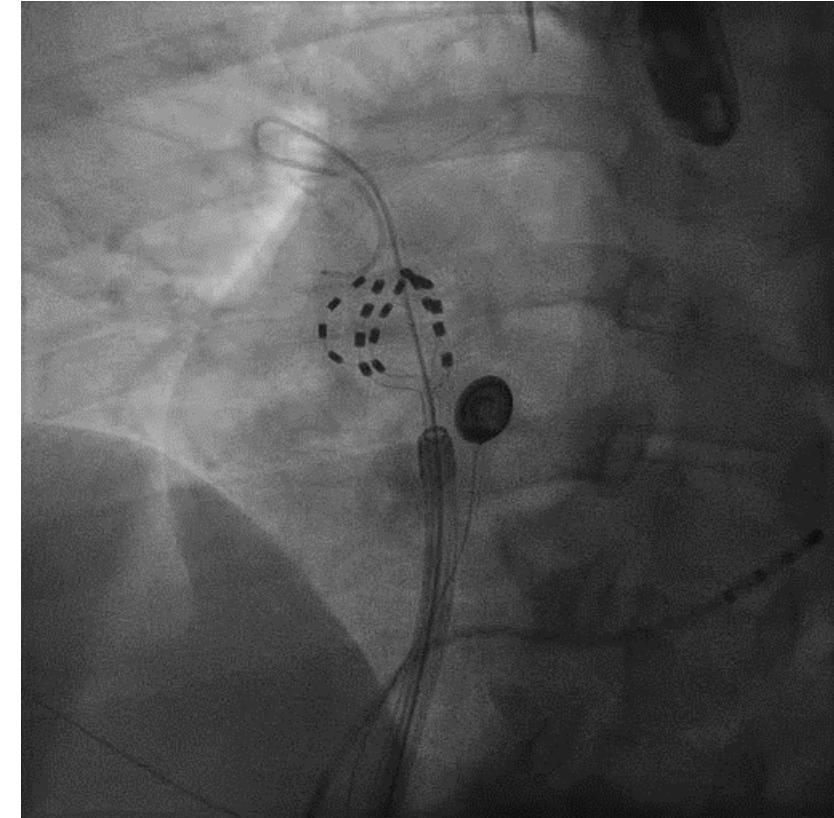

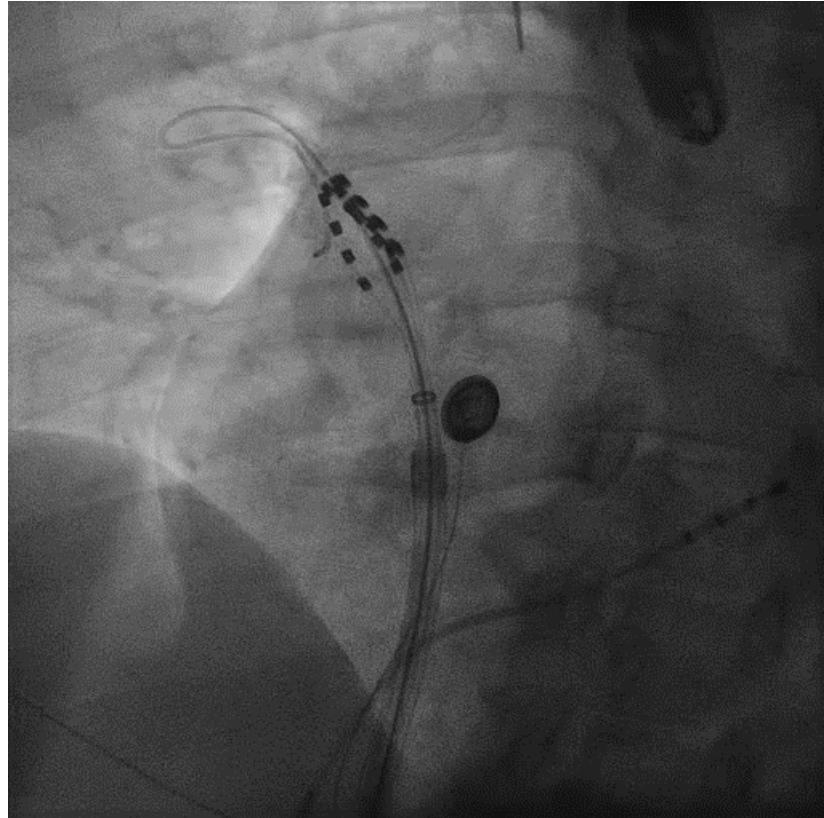

9:23

# *at inferior pulmonary vein*

# *Farawave – right inferior to superior*

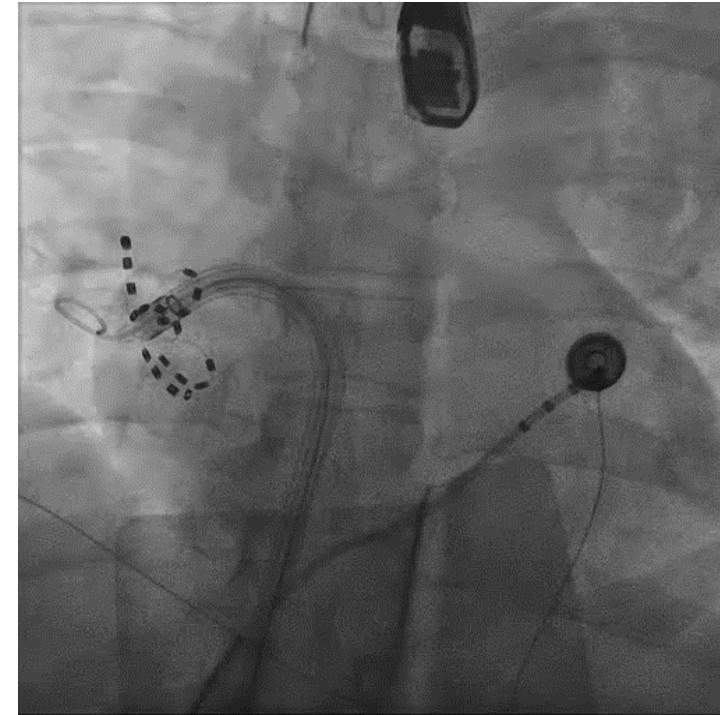

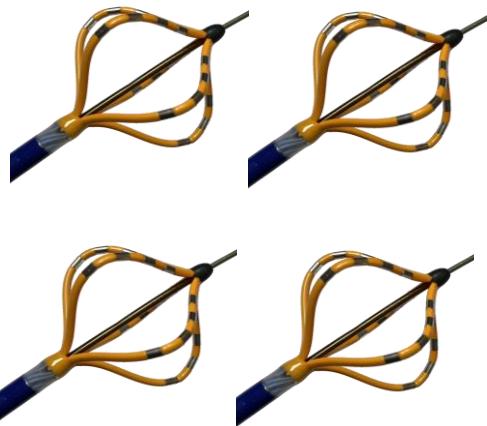

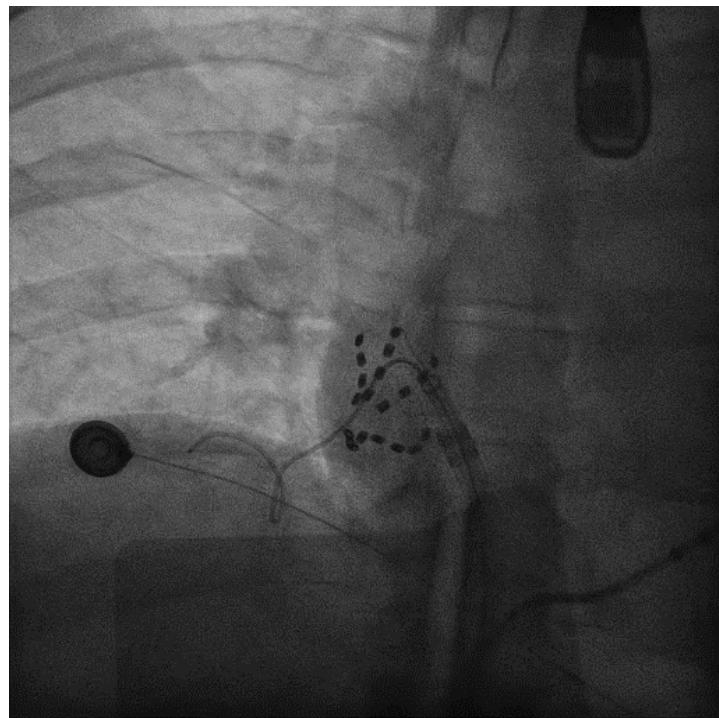

We didn't manage to switch from flower to basket in the RIPV

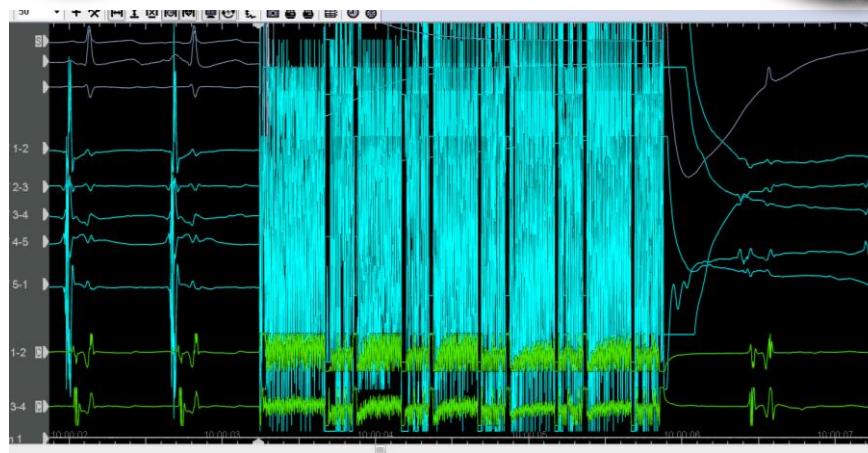

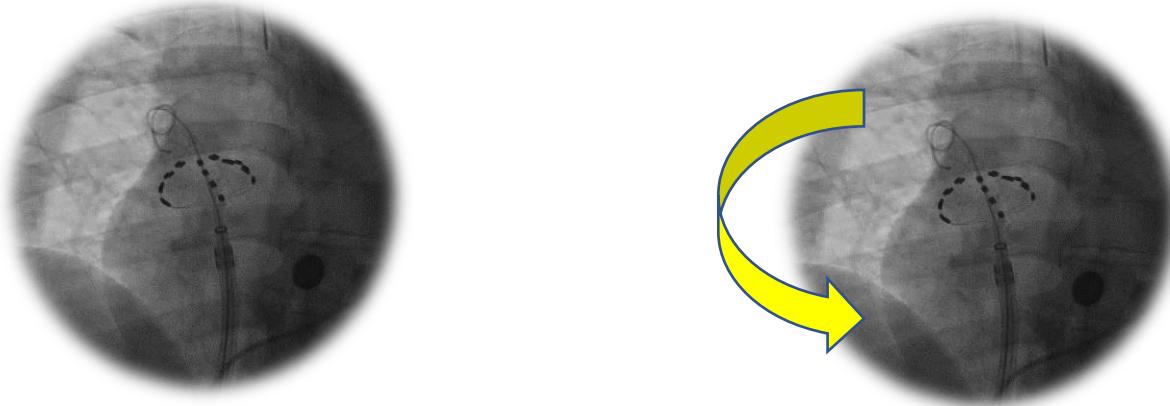

# *Farawave – inverted spline*

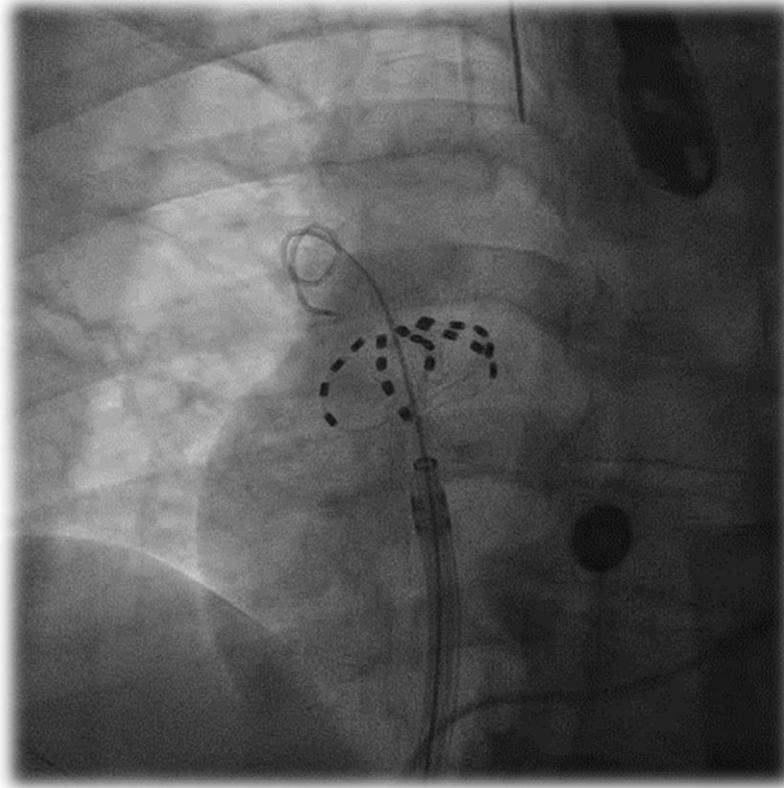

# Farawave – Return to the right inferior PV

# *Farawave – to the right superior PV*

# *Farawave – the RSPV from basket to flower*

# Knot at the end
